What is PREBIOTICS?

Ang PREBIOTICS sa halaman ay mga NATURAL na substansya na nagpapalakas ng paglago ng mga BENEFICIAL MICROORGANISMS sa lupa.

Galing ito sa organic compounds na nagpapabuti sa kalusugan ng lupa at halaman. Nakakatulong ito sa mas mahusay na NUTRIENT UPTAKE, mas magandang SOIL STRUCTURE, at mas mataas na RESISTENSYA ng halaman laban sa sakit at stress.

Dahil dito, ang prebiotics ay nag-aambag sa mas mataas na ANI at mas MATATAG na AGRIKULTURA.
